+ FABRICATION

+ PRODUCT OVERVIEW

We Are The Experts in Connection.

For over 50 years, we have been in the business of transformation, turning raw materials into connected ecosystems. Flanges, bearings, couplings, shafts, and more, all manufactured with precision to perfectly connect for both the extraction and transportation of water.

And this expertise transcends product. We navigate a highly interconnected network of suppliers, distributors, OEMs, and contractors with coordination, collaboration, and adaptability. We embed ourselves in our customers' teams, building foundational, long-term relationships rooted in trust and mutual business success.

At Custom Pipe & Fabrication, we expertly facilitate all points of connection to ensure water flows from point a to point b.
